

## Exercise 2: Verifying Interactions

From the previous exercise, i.e. Exercise 1, we have updated the MyServiceTest.java code and have created a new function ( testVerifyInteraction()) inside that file for this exercise. The updated file code is:

### MyServiceTest.java:

```
package com.example;

import static org.junit.jupiter.api.Assertions.assertEquals;
import org.junit.jupiter.api.Test;
import org.mockito.Mockito;
import static org.mockito.Mockito.verify;
import static org.mockito.Mockito.when;

public class MyServiceTest {

    @Test
    public void testExternalApi() {

        ExternalApi mockApi = Mockito.mock(ExternalApi.class);

        when(mockApi.getData()).thenReturn("Mock Data");

        MyService service = new MyService(mockApi);

        String result = service.fetchData();
        assertEquals("Mock Data", result);
    }

    @Test
    public void testVerifyInteraction() {

        ExternalApi mockApi = Mockito.mock(ExternalApi.class);

        MyService service = new MyService(mockApi);

        service.fetchData();

        verify(mockApi).getData();
    }
}
```

# Output:

```
