

Hands on 10_OfficeSpaceRentalApp

App.js

```
import React from "react";
import officelmg from "./office1.jpg";

import officelmg from "./office2.jpg";

function App() {

  const officeList = [
    { Name: "DBS", Rent: 50000, Address: "Chennai", Image: office1 },
    { Name: "Regus", Rent: 75000, Address: "Bangalore", Image: office2 },
    { Name: "WeWork", Rent: 65000, Address: "Hyderabad", Image: office1 }
  ];

  return (
    <div style={{marginLeft:"50px"}}>
      <h1>Office Space, at Affordable Range</h1>

      {officeList.map((item,index)=>(
        <div key={index}>
          <img
            src={officelmg}
            alt="Office Space"
            width="250"
            height="250"
          />

          <h2>Name: {item.Name}</h2>

          <h3 style={{
            color: item.Rent <= 60000 ? "red" : "green"
          }}>
            Rent Rs. {item.Rent}
          </h3>

          <h3>Address: {item.Address}</h3>
          <hr />
        </div>
      ))}
    </div>
  );
}
```

```
export default App;
```

index.js

```
import React from "react";  
import ReactDOM from "react-dom/client";  
import App from "./App";
```

```
const root = ReactDOM.createRoot(document.getElementById("root"));  
root.render(<App />);
```

Output:
