

Spring Core – Load list of countries from Spring Configuration XML

Country.java:

src/main/java/com/cognizant/spring_learn/Country.java

```
package com.cognizant.spring_learn;

public class Country {

    private String code;
    private String name;

    public Country() {
    }

    public Country(String code, String name) {
        this.code = code;
        this.name = name;
    }

    public String getCode() {
        return code;
    }

    public void setCode(String code) {
        this.code = code;
    }

    public String getName() {
        return name;
    }

    public void setName(String name) {
        this.name = name;
    }

    @Override
    public String toString() {
        return "Country [code=" + code + ", name=" + name + "];"
    }
}
```

country.xml:

src/main/resources/country.xml

```
<?xml version="1.0" encoding="UTF-8"?>

<beans xmlns="http://www.springframework.org/schema/beans"
  xmlns:xsi="http://www.w3.org/2001/XMLSchema-instance"
  xsi:schemaLocation="
